## ISTQB® Foundation Course in Software Testing - 3 Day Course

### Course Overview

The Foundation Level course is aimed at software professionals who need to demonstrate practical knowledge of the fundamental concepts of software testing. During this course you will learn:

- The fundamental principles of Software Testing
- How software testing fits into the software development lifecycle
- The importance of test process, objectives, techniques and tools
- Essential functional and non-functional test methods
- Basic test design and measurement techniques
- Fundamental test management principles
- How to select and effectively implement software testing tools

### Pre-requisites

No specific professional prerequisites are assumed however attendees are expected to be literate in the use of software applications and ideally have at least a minimal amount test of software test experience.

### Level and Professional Orientation of Audience

This course is ideal for quality analysts, testers, test analysts, test engineers, test consultants, test managers, user acceptance testers, software developers, project managers, quality managers, software development managers and business analysts.

### Examination

This course will prepare you for the ISTQB® CTFL (Certified Tester Foundation Level) exam. The exam is not provided as part of this course but can be independently scheduled through Pearson Vue at <http://www.pearsonvue.com/isqi/>.

Details on the exam are available at:

[https://www.isqi.org/tl\\_files/data/documents/BoE/BoE\\_ISTQB\\_CTFL.pdf](https://www.isqi.org/tl_files/data/documents/BoE/BoE_ISTQB_CTFL.pdf)

### Follow on Courses

Once the Foundation Level qualification has been achieved, there are three further courses of study:

- ISTQB Advanced Level Certificate - Test Manager
- ISTQB Advanced Level Certificate - Test Analyst
- ISTQB Advanced Level Certificate - Technical Test Analyst

### ISTQB Foundation Course Presenter - Fergal Hynes

Fergal has 23 years of commercial experience in the software development and test industry in Ireland and abroad, operating at all levels from technical expert through to senior manager. Qualifications include an honours degree in Electronic Engineering, certified ScrumMaster and Fergal is an ISTQB© certified tester at all levels (CTFL\CTFL-AT\CTAL-TM\ CTAL-TA\ CTAL-TTA). Fergal has spoken at international software conferences on the topic of software testing and software test automation.
